Summary

Full-Stack Software Engineer with experience in **payment infrastructure**, SDK integrations, and scalable backend systems. Analytically driven and communication-focused, with a record of **40–60% efficiency gains** through REST API development and AI/ML automation across **10+ enterprise clients**. Progressed from independent freelance delivery to owning multiple products at a global payments firm in **Agile** environments.

Skills

Languages: Python, JavaScript, Dart
Frontend & Mobile: Flutter, React.js, Android SDK, Cross-platform Development
Backend: Node.js, REST API Development, LangChain, OpenAI API
Databases: Firebase, MongoDB, SQL, ChromaDB, NoSQL
Tools & Practices: Git, Postman, Jira, API Integration, Agile/Scrum
Soft Skills: Technical Communication, Team Collaboration, Stakeholder Management

Work Experience

- NTT DATA Payment Services**
Software Engineer

Nov. 2024 – Present
Mumbai, India

 - Evaluated integration requirements and engineered **SDK kits in Node.js, Flutter, and Go** for payment gateway REST APIs, cutting onboarding time by **40%** and support tickets by **20%**; collaborated closely with the solutions team to ensure seamless merchant adoption
 - Partnered with **10+ organizations** across education, NGO, and government sectors to **gather, document, and communicate requirements**, translating stakeholder needs into secure **checkout solutions**
 - Delivered **AI/ML-powered RAG chatbot** and **Configurable Form Builder** (see Projects), cutting query volume by **30%** and slashing build effort by **60%**
 - Actively collaborated across **Agile/Scrum** sprints — conducting code reviews, **communicating technical decisions** to stakeholders, and progressively owning **SDK, AI, and form-builder workstreams** within the first quarter
- Freelance Software Developer**
Full-Stack Mobile Developer

Jan. 2024 – May 2024
Remote

 - Independently designed and shipped *Lucrente*, a **cross-platform** rental app built with **Flutter** featuring landlord/tenant modules, property listings, booking workflows, and **Razorpay** payment integration
 - Built and optimized **MongoDB-backed REST APIs** with efficient state management, a points-based reward system, and responsive UI — work that directly led to a full-time role in enterprise payments

Projects

- RAG-Based Chatbot** | *LangChain, ChromaDB, OpenAI API, Python, Node.js* | **NTT DATA**

2024 – Present

 - Architected a production-grade **Retrieval-Augmented Generation** pipeline — analyzed documentation gaps, indexed API docs into **ChromaDB** vector store, and served context-aware **NLP** responses via **OpenAI APIs**
 - Automated query resolution end-to-end within the **software development lifecycle**, driving a **30%** reduction in ticket volume and meaningfully shortening new hire onboarding time
- Configurable Generic Form Builder** | *Flutter, Node.js, REST APIs, Excel* | **NTT DATA**

2024 – Present

 - Assessed merchant onboarding patterns and built a reusable **drag-and-drop form builder** with dynamic field configuration, transaction status API hooks, Excel bulk upload, and customizable receipt generation
 - Eliminated per-merchant custom form work, reducing build effort by **60%** and go-live time by **50%** across **10+ deployments** — a widely adopted internal tool at NTT DATA

Education

- Mumbai University**
Bachelor of Engineering in Cyber Security

Jun. 2024
CGPA: 8.5/10

Achievements

- Best Rookie Award** – NTT DATA Payment Services (2024): Recognized for rapid skill acquisition and quality delivery across multiple projects within the first quarter
